FROM THE MENTOR'S DESK

With the strong belief to nurture the society through taking care of its people and environment, we at Victoria Jute Company are committed to deliver exceptionally well performance to its customers and all stake holders. We believe that future belongs to those who will holistically manage technology, human resource, raw material and processes to produce eco-friendly, quality and mass affordable diversified products. As a nation and world, the biggest challenge is to protect and gift the better future to its coming generations, with the high sense of morality we are contributing our bit by using all our resources and senses meaningfully and optimally to deliver our affordable quality products On-Time, In-Full and Error-Free. Some of our initiatives like installation of Solar project, in house poly houses, E.T.P. plant, usage of energy efficient devices, lush green campus, awareness campaigns, installation of modern technological equipment's, emphasis on eco-friendly products using high level of research and development are enough to support our commitment. We are very alert and serious towards carbon foot-print and water foot-print, we believe that natural resources are precious and must be protected and flourished at any cost, to achieve the same, each and everybody in Victoria family try its level best always. Victoria is all about its people, we enjoy and celebrate each and every moment together, we learn through trainings, practical, seeing others and of course by research and development. The process of, Learn, Un-learn and Re-learn is in the DNA of Victoria.

We perceive continuous improvement as the mission, which is the accountability of everybody and is executed every day, everywhere at Victoria Jute Company.
